Title:

Comments: It is time for us to meet our obligations to be great stewards of Mother Gaia and preserve old growth forests. These forests are part of the future that will give my grandchildren air to breath and ways to battle climate change. Think of all of the children that will not be able to lay a hand on the bark of one of these giants and grok the meaning of interconnectedness that exists in our planets living systems. They are the great teachers of us all.

Please rise up and protect these forests for our future generations.
