Comments: Washington state is being logged hard , clear cutting and planting monocultures

Logging is permitted to close to streams and creeks.

More protection is needed for the old growth forest near the Olympic National park.

There is very little old growth forest left.

Protection for those pockets of old growth outside of the park should be a priority !

Many of the old growth trees are dying from climate change / drought stress.

I hope we can expand the protection of our forests, and especially the old growth trees.

It may be our last chance
