First name: Linda

Last name: Averill

Organization: Organized Workers for Labor Solidarity

Title: Co-chair

Comments: We're at a pivotal time in human and earth history where many question whether it is too late to reverse and survive climate change. We do know that old growth forests are carbon sinks- and disappearing at an alarming rate due to climate change.

This doesn't include the importance to biodiversity.

Please do whatever must be done to save our old growth forest s and trees
