Comments: Dear Secretary Vilsak and Secretary Haaland,

I would like you to protect our forests per President Biden's Executive order. Please be sure to define "old growth" as those 80 years and beyond.

I do not understand why any US Forests should be available to commercial lumber interests. I understand there are trees that are dying and culling that already dead lumber might help with subduing forest fires. The main culprit causing forest fires is global warming. Forests help keep our air cleaner, and help combat global warming. The more our forests are preserved, the better life on our planet will be.

Thank you for doing your part in helping us to preserve our forests.
