First name: Edward

Last name: DeCarlo

Organization:

Title: Retired USFS

Comments: Old Growth should not mean unmanaged. Examples of managed old growth should include municipal water sources, and important recreation areas such as ski areas, where reduction of stocking density is needed to allow prescribed fire which is needed to prevent risk of loss from wildfire, insect mortality and loss from extended drought and changing climates. Uneven aged stands can be managed to provide old growth wildlife habitat, and can therefore qualify as old growth.
