Comments: Objection Reviewing Officer,

I am asking you to please not let the Jenny Gulch Gold Exploration be enacted.

This is letting the mining companies in the door. You think you can let them explore drilling thousands of holes and if they find gold that you will not give them the green light to go ahead and pollute our water and cause damage to the land, wildlife, and all of us that rely on that water source? Small chance. So don't go there. We have had one mining company after another come and ruin the environment and leave the mess to the state.

Please say no to the companies.

Thank you for letting me comment,

Becky Fisher
