Comments: To whom it may concern,

Thank you for reviewing my comments related to the Kaniksu Over-Snow Vehicle Travel Plan #53091. I encourage those involved in planning and implementation to limit the area opened to OSV use as much as possible.

I believe it's important to limit and reduce human impacts in our National Forests now more than ever, particular when it comes to motorized vehicles. This is important in terms of ecosystem and biodiversity health. Preserving the habitat of Grizzlies, Woodland Caribou and other imperiled species that have historically occupied these areas is more important than providing opportunities for people to ride snowmobiles.

Protecting these areas is also important in terms of the negative impacts motorized vehicles have on other recreational activities occurring in National Forests. Please maintain the quality and character of our forests by limiting motorized vehicle use. Thank you again for your time.
