First name: Dolores

Last name: Brzycki

Organization: IUP Retired

Title:

Comments: White's Woods should not be timbered. All the experts I have heard or read indicate the woods are healthy and do not need thinning. In fact, cutting trees will open the canopy and allow more growth of invasive species. The woods should be preserved in accordance with the way in which they were set up under DCNR. They add value to homes not only on White's Woods but also in the entire township and adjoining borough. They help protect homes both in White Township and Indiana Borough from flooding and heat. They provide a great place for learning and relaxation.
