Comments: I am writing in support of the permit for the temporary (winter use) hut system proposed for DeRoux campground. As a casual backcountry skier, I have often find myself wishing there were more opportunities to utilize huts or yurt systems in remote areas to provide easier access to a wider variety of user groups. I have accessed this terrain early and late season, but without a snowmobile find it difficult to get deep enough into the Teanaway drainage in a day to enjoy the mountain terrain. Our region has seen booming growth one nonmotorized backcountry uses in the easier to access areas, and leveraging existing facilities to expand access is a great way to reduce user conflict in other areas. I understand there is some snowmobile access in this area but am confident that with some coordination there is plenty of space for all to enjoy.

Thanks for considering this opportunity and taking public input on this project.
