Comments: I support the idea of winter hut access to the backcountry. However, I just oppose doing it in an area that is already accessed by existing backcountry users. I have a couple concerns:

- 1). I have a strong negative reaction to an independent party being able to utilize a public resource currently utilized by other winter recreators in a for profit business venture. What makes the sponsor so special?
- 2). I am concerned that the proposed business will dislocate current users or otherwise detrimentally affect their experience in this public resource.
- 3). The more successful the sponsor is in this business proposal, the greater the negative impact to existing users. Let's take the profit motive out of our public lands.
