Comments: US Forest Service:

I would like to express my opposition to continued logging of large and old growth trees on Federal Land. This logging is impacting habitat for flora and fauna in these areas. Further, living in Eugene, I drive by lumber processing mills daily. Everyday an enormous amount of timber waiting to be processed and huge stacks of processed timber waiting to be loaded on trains. In addition there is processed timber stacks piled all over these premises. I have seen the logs waiting for milling. These are not logs are not salvaged from a fire area; they show no signs of fire.

I think it is time for a moratorium to determine the condition of the federal lands at this time, which trees should be available for logging, and what impact any further logging will have on these forests. As a result of the moratorium, there should be permanent standards for how much logging should be allowed.
