First name: Linore

Last name: Blackstone

Organization:

Title:

Comments: Instead of practicing target management, it's time for the federal agencies to practice preservation. We humans have been everywhere and taken and taken. The old growth trees are sacred and should stand to protect the wild creatures, the climate, the earth, us. Why are we chopping them down? There are consequences to our brutal and careless taking. Act with integrity and wisdom. It's very very late.
