Comments: Most old growth forests in the Pacific Northwest have already been cut down and replaced with second growth. We need to do a much better job protecting what is left, for the sake of future generations. It is a disgrace that so much of these majestic lands have been mismanaged and will not be available for my children to enjoy. Despite President Biden's Executive Order, the US

Forest Service and BLM continue to log these forests, which is unacceptable. I strongly support any and all measures to permanently protect mature & old-growth forests and trees across all federal lands.
