Title:

Comments: Comment's Douglas hill OHV and camp ground #61767.

Tentative proposals are straight forward, mostly acceptable.

Both camp grounds over night should be fee paid, no exception.

Camping locations well marked and enforced.

Yes, compliance on days stayed and leaving trailers on forest service property over 24 hour unattended very common now.

An OHV enforcement officer should be employed for compliance issues as a seasonal forest service employee with law enforcement capability. Begin earnest enforcement April 1st.

. Children under age many times operate OHV with no parental or mentor over seer in eye sight with OHV operation. This needs to stop, serious safety issue, never should happen.

The Douglas Hill point is a heavily used and badly abused location. A place for to many drug users. I walk these acres often finding trash, syringes, and crapper waste even is sight of the outhouses.

Wire off point to prohibited vehicle access.

Non highway registered OHV,s travel Douglas Hill road all the time, needs to stop[.

Comment, North of Rexford boat launch is a need for another well developed boat launch on East side, terrible congestion issues at lake and a lot of drunk boaters. Consider West Kootenai launch.
