Comments: i am in favor of shutting down logging of american foress on public land. i think those on private land can sell their land for logging etc if they want to but we need a massive effort to protect all forests from logging drillnig etc. we get so much from trees. recreation. peace. the trees produce oxygen for us to breathe, they keep down floods, they provide a home for wildlife, they protect from wild climate. we cannot allow them to continue to be mauled by the us dept of agribusiness, which is so anti environmental it hurts. the us dept of ag never saw a forest it did not want to cut down for money. they are all croesus in that dept, seeing everythig natural that they can make money on. its horrible.this comment is for the public record please receipt. jean pbuliee jean public1@yahoo.com
