Title:

Comments: Please survey and then protect our old growth forests they cannot be replaced for generations and there are many species that only live in old growth forests. They are critical to a healthy environment . They are threatened on many Fronts from Wildland fire, clearing for other uses, and abuse front folks who don't care about our wild world and want to use it for recreation but litter, leave campfires and abuse healthy trees to just try and axe, driver vehicles off trails. I see this almost Dailey as I live and Adjacent BLM and ational Forest lands.

Please act to protect these vital areas.

Bill Andrie
