First name: Lois

Last name: Howlett

Organization:

Title:

Comments: Please protect our remaining old growth forests as soon as possible. These trees and the other diverse flora and fauna they house and extremely important in protecting a livable future for the next generations!! The trees sequester huge amounts of CO2 and as Thoreau said: In wildness is the preservation of the World. There is no time to waste here!!

Thank you for your quick action,

Lois Howlett, naturalist, grandmother
