Title:

Comments: I live out of state and frequent the Red River gorge to climb and enjoy the nature in that area. I believe that logging could potentially hurt the tourist industry that surrounds the Red River gorge. I hope that our voices are heard when we express how upset it would make us to see areas that we love logged. Please do everything in your power to protect this area from logging and to also protect the tourist industry that surrounds hiking and climbing in the Red River gorge.
