Title:

Comments: Please do not limit public involvement in forest management, doing so would contrary to the values of this nation. Please implement more prescribed fire. The forests are decaying without it. Please always consult local tribes in your management process. Please limit logging operations to that which will benefit watersheds ie NO MORE CLEARCUTS, NO MORE ROADS. Perhaps create access for fire personnel and restoration work, this will also enhance public lands for all types of recreation. Thank you for your attention.
