Comments: Hi there, I am a mother and citizen who cares about safeguarding our pollinators. I ask you to please safeguard this incredible forest ecosystem for future generations. Forests are critical carbon sinks which is essential in this time of climate change, and they also provide essential habitat to countless unique species. Please do all that you can to protect them and not log them any further. We will benefit financially in the future from investing in forest protection now. Thank you. Have a great day, Amy
