Title:

Comments: I understand the need to protect the environment and the wildlife in it but there must be a better way to do it besides closing the public's access to these locations during the peak riding season. I oppose the proposed travel plan - if there must be a closure, it should be after May instead of cutting off the little time we have to enjoy the snow.

Everyone I have ever met that rides snow bikes and snowmobiles are responsible riders and caring of the environment and wildlife. This type of closure is unnecessary.
