Comments: As a local business owner we get multiple calls a month regarding stuck vehicles on the Forest. Our only comment would be any long term improvements(ie. mud rock, asphalt, concrete) would be beneficial to anyone who uses the roads currently. We invite any and all road improvements. Moreover, we believe the funding is also needed for continued maintenance of the current roads. No matter which section of current roads you choose to improve, there are many more miles of deteriorating roads. In the past, no matter which section you choose to improve, there is always one group of "public land users" that complain that the Forest personnel is catering to one group or another. We believe that the entire National Forest is public owned and everyone has right to use it, no matter the hobby you happen to have.
In closing, ALL the roads need attention and we would welcome any and all improvements.
