Comments: It is important to keep these places accessible to the average person as something's other than an employee. I see this as isolating the middle class from accessing more and more of America. It is important that the west not become a theme park rather than a widely accessible region that exists happens predominantly with nature ruling the day and people being able to enjoy not based on their ability to afford the toll primarily as a means of profit for an absentee and distant entity. I'd rather see the lodge removed and the site preserved in its natural state as a park. Thank you for your interest.
