Comments: Hello,

I'm writing this as a local Montanan who has lived in the beautiful Flathead Valley for over 30 years. I love this state and I take pride in my home, as have the many generations before me who were born here and raised here. What has happened around this valley over just the past 30 years is sickening and we do not need more developers coming in and destroying this place. It's one thing to fix something up and take care of it, but unfortunately that's not what we're seeing here. We are seeing land sold off to the highest bidder and beautiful untouched nature being completely ruined for profit. It needs to stop. Part of living here is keeping it wild and respecting it for what it is. It is not changing it to accommodate the luxuries that bigger cities provide. If that's what you're looking for please go somewhere else. I am tired of seeing my home be destroyed by people who have no respect for the land and the people who lived here first.

I can not sit back and watch this beautiful home of mine be reduced to a place where only the rich can afford to live. I know that I speak for the majority of the locals when I say something needs to be done to stop the development and destruction.
