Comments: I have grown up my entire life in the Flathead Valley. For years my family has camped and hunted down the Swan. What use to be our "small town" has grown into developments and resorts. Where will we take our children? We are generations deep in this valley and it's getting destroyed by people who do not respect our lands. These lands were not made for resorts. Money has become the priority and it's truly disgusting. What once was a quiet get away will now become a money hole. People from all over will come and trash the lands around and our towns near by. I hope this movement never moves forward. And if it does, what a shame it would be.
