Comments: As a resident of Flathead County who frequently enjoys the beauty of Holland Lake, I find it deplorable that more PUBLIC land is being sold off to the highest bidder. The wonders of this state should be freely accessed by all, not limited to only the elite who can afford to stay at expensive resorts. We are already experiencing decreased levels of available workforce so who, will operate this new venture? Where will the affordable housing be for those who work there? No other resort here has been able to provide fair and equitable compensation as well as housing, so how will this be any different? While improvements to the current facility would be beneficial, transforming it into a resort style community would be a detriment to the community members in the surrounding areas. I implore you to consider the effects on residents of this area, rather than the effects on the wallets of those involved. If this is the pace at which we move, considering only money and ignoring the sanctity of nature and the community arounds us-we will soon run out of both.
