Title:

Comments: Holland Lake is treasured resource for many Montanans who enjoy its rustic quality, trees, hiking trail, and peaceful environs. Trees help keep carbon from escaping to the atmosphere. The proposal for an expanded lodge and tree removal will only bring more cars and increase our carbon output--irresponsible in a time of climate change.

This lodge will also put a strain on forest fire resources already stretched thin in our state.

We don't need more resorts for the wealthy. Leave the average Montanan a treasured resource that is ours.
