Title:

Comments: I have lived in Montana my whole life. Montana has changed drastically Due to corporations Wanting to commercialize our beautiful state. I am a 1000% against The Holland lake area area becoming a large resort. Most of the time when companies come in to make a resort the average Montana person cannot afford to use the facility. What makes Montana amazing is it mountains and landscapes. If we continue to develop Everytime an out of state corporation Wants to make a fancy resort we will no longer have those mountains and the peaceful place. I camp every year at Holland lake. I consider it my home away from home. When I go to the mountains I don't need luxuries I am trying to get away from the craziness of the world. And just enjoy the beauty our state naturally offers. I truly hope this project does not go forward! Please please do not sacrifice This beautiful place to a corporation, That only cares about profit. Life is too short there are so many more important things than money.
