Comments: Please reject the proposed plan for Holland Lake Lodge. The proposal is flavored with promises of restoration and preservation but is ultimately to expand, develop and exploit one of Montana's last best places. A project of this size will adversely affect the very spirit of this place and the quiet serenity will be forever lost. Holland Lake is already at risk of being loved to death. Allowing such a large development will adversely impact wildlife in the area as well as the human experience that we have cherished for so many years.
