Comments: My husband, Jim and I are very concerned about the expansion planned at the Holland Lake Lodge for the following reasons, including not getting enough feedback from the community:

1. The Holland Lake Lodge Master Development Plan was not made publicly available on the Flathead's web site until September 6. The public needs plenty of time to review this 36-page document and the Forest Service's 16-page "scoping" document.
2. The scoping document is dead wrong to presume this mega-development can be "categorically excluded" from the prior preparation of an Environmental Assessment or Environmental Impact Statement. Such shortcuts are intended for constructing an outhouse or a tool shed, not a destination resort!
3. Before Big Mountain was allowed to expand its ski area in 1995, the Flathead rightly prepared an Environmental Impact Statement on whether it should be allowed under that ski area Special Use Permit.
4. Before the Flathead allowed the Big Mountain ski area to expand ski lift facilities in Hellroaring Basin in 2019, it prepared an Environmental Assessment to be certain it should be allowed under the Special Use Permit.
5. The Flathead must provide 60 days for public comments on these Holland Lake "scoping" documents and then prepare an Environmental Impact Statement that fully assesses the potential impacts of this mega-development on this historic, rustic area and its natural ecosystems.

Thank you
