Comments: Holland Lake Lodge should NOT be granted permission to expand or turn it into a resort destination.

1. The Lake is too small for an expansion of the lodge. (400 acres)
2. Sewer would be an issue for the environment
3. A pair of loons nest on the lake each year and have one to two baby loons. The loons need clean water and are sensitive to the effects of pollution and human disturbances. By expanding the lodge you will create stress for the loons.
4. Dust is already an issue on Holland Lake road to the Lodge.

The Forest Service lease should protect Holland Lake Lodge from buyers who want to expand the Lodge and turn it into a resort destination! The purpose of the lease is to limit what can be built and done with the leased land. Please Protect this environmentally sensitive area from over expansion!
