Comments: I strongly oppose your push to close off 99% of our late spring riding opportunities! These are "public" lands for us to use and all that keeps happening is we are losing access to them, one reason at a time! How about the reason we cannot ride basically from Pack River to the Canadian border besides in narrow areas? Because of "Caribou" that do not even exist in the United States any more! Keep the areas open to the PUBLIC like they should be. I for one do ride after April first, heck I have ridden powder on the 22nd of April and snow pack permitting will ride well into May and not once in the past 13 years or riding have I come across Grizzly in the higher elevations!

Please consider that our riding season usually does not start until January (snow pack permitting) and now you would like to cut two or more months off what little time we are given to ride.
