Comments: Holland lake seems to small for a resort of this size. I would like an environmental study done to see how it will impact the wildlife, and water. I would also like to see what impact it would have on the highway. The road is on a blind corner, there have been accidents and near misses there. What type of e.m.s. Will be there? Will you have a staff for that, and will you build more buildings to house them.

How are you going to compensate the private homes for ruining the pristine lake? Are you prepared for the boating accidents, with the amount of people you are putting on lake?

There are to many unanswered questions for me to support this project. It is not a good fit for the valley. There is nothing positive for the valley.

I understand it is a private business, but it is on USFS land. And for that reason alone there should be due diligence done with wildlife and traffic. Glacier park is limiting the amount of traffic going in. Since Highway 83 is the scenic drive to Glacier this should be limited also.

People go to Holland for the rustic feel, it will have none of that with the new buildings added.
