Comments: Dear Good People,

I have a few issues and concerns:

1. Does Condon have the health and safety resources for the Holland Lake Lodge project expansion?
2. The folks at Condon did not want a trash facility. How will garbage be contained and removed?
3. No EIR? This area is the winter habitat for big game species (Elk) and this project is now to be open all year during migration times, how will this not affect these migrations of species?
3. What will be the monitoring programs in play for ecological conditions? Will you have a focal species?
4. What are the adaptive managements in play for this area?

Thank you for any direction in this!

Truly,

Lisha Mainz
