Comments: I am oppsing the proposed Holland Lake Lodge expansion, as it is proposed now. As a life long native of Montana and growing up in the Swan Valley, it is just too big of a project and would further the negative impact on the pristine wilderness that defines that area. I do understand that Holland Lake Lodge needs upgrading, I am not opposed to that however an out of state entity that has no interest in preserving or caring about an area that is so important to the the very fiber of this state is not the way to go. It is too big.

This is being fast tracked for some reason, impact studies being bypassed completely? Endangered species habitat being impacted? Where is the oversight on this?

My father was a hunting guide in the 30's in the Bob Marshall wilderness, Holland Lake it the gateway to the Bob Marshall Wilderness and I fear this project will encourage further developement into that very special area.

PLease, please do your due diligence before this is pushed through and there is no way out!
