Title:

Comments: The public must have more time than 2 weeks to review this development plan. September 21 does not give us enough time. Of course, there should also be an environmental assessment or impact statement required for an expansion of this magnitude in the middle of a wilderness area. Big Mountain/Whitefish Resort was required to make environmental assessments before expanding-this development should also be required to do the same. The Flathead must allow 60 days for public comments.
