Comments: To Whom it May Concern:

My family has been going to Holland Lake for 25 years. My husband & I, our children & their families enjoy every summer there (we call it Memory Lake), our granddaughter was proposed to at the falls, a grandson was married at the lake & my husband's parents celebrated their 60 wedding anniversary at the lodge. We just returned from a 15 day vacation at the lake as we do every year & met some wonderful people enjoying their vacation at their most favorite recreational site.

We are very concerned & against the proposed Holland Lake Expansion Complex being considered. It would be very harmful to the area & ruin the pristine Holland Lake that so many people love & enjoy. Large corporations come to our beautiful state & force local people out of the area with their ideas of nothing but "making money".

The Forest Service should consider the tax paying citizens that want Montana to stay Montana. I appreciate your time & consideration.

Julie Gibson
