Comments: I oppose commercial development and expansion of Holland Lake Lodge. I also oppose installing floating docks and expanding recreation equipment rentals. It would litter the landscape of one of Montana's "Last Best". Let's restore and keep Holland Lake a place of natural and serene beauty.

I support repairing and restoring the historical lodge without expansion. Expansion would only eliminate the valuable historical education currently available for future generations. It would also strongly impact precious wildlife in the area.

I propose implementing a noise ordinance so that people can learn to value the sounds of nature that are becoming rare and unrecognized in our motorized and money driven culture. Setting a limit of 10 HP watercraft motors would help restore and promote a healthy environment for existing loons, turtles, osprey and various precious species. The lake is too small to support large motorized watercraft that erode the shoreline and muddy the pristine water.
