Comments: I'm writing to oppose the proposed expansion of Holland Lake Lodge. I camp every year at Holland Lake with my two children and have been doing so for years. When my mother was a child she would camp at Holland Lake with her family. Expanding the lodge to allow for 156 person occupancy is going to completely destroy the serenity of this small lake. The increased traffic, increased noise pollution from speedboats and other motorized water craft, etc. will change what makes Holland Lake special. The Forest Service should absolutely complete an EIS for this project, and not give blanket approval. Please don't turn this special place into another over crowded resort that destroys what makes the place special in the first place. It's quaint, and so should stay the accommodations.
