Title:

Comments: I am becoming sick to death of deep pocketed corporations turning Montana into a playground for the rich. This area does NOT need more expansion and people. It does NOT need swimming docks, increased clueless idiots paddling and hiking about, increased parking lots, increased nitrogen into an alpine lake, and increased carbon burning mega SUV's to get the people there. POWDR is interested in nothing but more money, of course coating their rhetoric in the latest catchphrases of their deep (NOT) concern for this delicate environment. "Soulful Experiences"-gag me! It is basically criminal from my perspective to allow any of this crap to proceed without an EIS as a bare minimum.
