Comments: To whom it may concern,

As lifetime citizens of Montana, this concerns me that this is proposed. Holland Lake is a place where Montanans go for peace and quiet. This will bring more and more people to this Lake and the habitat around the lake will suffer. As the years have come and gone, the population growth has had quite an impact on the environment around the lake. From the amount of people on the trail to the amount of people that are using the lake. This also impacts wildlife habitats as well. Please really think about this and what the impact on the environment that this will have. As Montanans our family has grown up here and we'd like our grand children to be able to enjoy this as well. Please consider how this would impact the area. More traffic on the highway, more waste along the roadsides and the lake as well as the Falls trail.
