Comments: Holland Lake currently is an affordable treasure for local Montanans. Just like any out of state company, they aren't here for the locals but here for the most money. Our local landmarks continue to be over run by out of state interests and money that don't put MT, its history, its locals first. It's all about the almighty dollar and as a Montanan, I'm tired of these projects that are to attract the rich only. MT is worn out of people thinking they can bulldoze us with their money. I wholeheartedly think this project should be a NO from the forest service. The impact on the surrounding areas, animals etc isn't worth it.
