Comments: This development on holland lake cannot happen! None of the locals want this, and it is just developing another special place into a tourist trap. Montana does not NEED the tourism money from this, and the small lake will be unable to handle this type of tourism. The loons will leave, the locals will be priced out, and we'll turn it into another Whitefish or Big Sky that used to be affordable and fun for all of us and now are for out-of-staters and profit. Please, please try to keep something for the locals. Try to keep our home state from turning into something it's not. If they want that, they can go elsewhere. We don't NEED another ski resort or development. This project should be ended before it starts.
