Comments: Hi there! I understand the need/want for beautiful lodge resorts like this one, but, first: in doing this, you cut down precious trees that are literally disappearing from our earth. One day in the future everyone will be looking at pictures of forests rather than experiencing them, and using oxygen tanks instead of breathing clean air, all because of this one thing - cutting down trees. Second, have you thought about all the people living in the area who will no longer have this beautiful lake area? The same people that most likely won't be able to afford using your facility. The people that will use it will be privileged, and unknowledgeable about what has been destroyed. Third, what about the animals that will die most likely terrible deaths of starvation or fighting each other for space that has been lost, or animal families broken apart and the horrible endings to them because of it? Please do not destroy this lake and surrounding area with your plans. Instead, work with the people who live there to build something that works for everyone. Thank you for listening.
