Comments: Dear Forest Service, I'm very concerned about the size of the expansion being considered for Holland lake. The lake is not very big, and the number of people that this expansion will bring in will harm the pristine beauty of this place. I ask that you to consider conducting an environmental study before continuing with this project. I also suggest that you consider eliminating all motorized vehicles from the lake. If you are going to allow this many people to be there, I really believe motorized vehicles need to be prohibited to maintain the integrity of the shoreline, the wild life, and overall peacefulness that is unique to it. Holland lake is such a treasure. I really hope that the State of Montana chooses to protect and preserve it from people simply looking to make money from it. Please consider the water quality, noise pollution and the diverse water birds that live there before continuing. I fear you will destroy this little paradise if you bring in so many people AND allow them all to have motorized vehicles. Respectfully, Betsy Duerksen
