Comments: I am reaching out to express my strong opposition to the proposed Holland Lake Lodge Expansion. Fast tracking this approval without a COMPLETE Environmental Impact Study (Statement) or Environmental Assessment would be an irresponsible, irreversible decision by the National Forest Service. A huge mistake. I urge you to slow this process down, conduct thorough studies, and seriously consider the public comment regarding this matter.

"I recognize the right and duty of this generation to develop and use the natural resources of our land; but I do not recognize the right to waste them, or to rob, by wasteful use, the generations that come after us."

-President Theodore Roosevelt
