Comments: Dear Sirs,

A major expansion of the Holland Lake lodge to a full destination resort must be fully reviewed by the public landowners and not categorically excluded from a full environmental review.

I do not feel that the owners of the Lodge have conducted the usage of their current privilege to operate their public land lease in consideration of the Public interest.

The current owners have been rude and have tolerate people to leave if they just land their boats and even sit on the grass. This is Public Property! They have treated the local people Quite rudely as if we are not worthy to them and they can act as if they have total ownership Of the land. There are also been stories of them cheating the local workers as well.

Please extend the comment review period so the true sentiment of the local public can be heard.

Holland Lake is a great resource and should not be given to an outside Operator to take the lake more so than they have already

Peter C Guynn
