Comments: I am against -- and very concerned -- about the proposed expansion of Holland Lake Lodge and the added pressure this expansion will have on the local ecosystem -- as well as local infrastructure, including park access, septic issues, water safety, road congestion and more. The lake and surrounding area is already seeing pressure from increased traffic and use and a year-round large resort will destroy the uniqueness of the lake.

This lake and area is not equipped to handle the impacts of a large resort. Any financial benefits that come from the resort will go out of the state and any financial woes as a result of this project will be put on the local people and on the state. This expansion will be the death of Lake Holland, will cost MT residents \$, is detrimental to the local community and will destroy everything that people love about Lake Holland.
