Comments: Hello:

Holland Lake is a small lake frequented primarily by local traffic. If this project goes forward, the size of it, the density it will bring to the Lake, and the money that will come into the area, will not only make it impossible for locals to use the campgrounds they have frequented for generations, it will also make it difficult to protect the forest, the wildlife, and the lake itself.

The amount of development in this area is staggering, and a project like this will quickly overwhelm the existing infrastructure. And like with almost every project we encounter, the opportunities for locals (the area campgrounds and public launches) will suddenly be pressured to close or reduce capacity. We do not want our open spaces or our recreational opportunities set aside for a for profit business.

I oppose this project and any further development on Holland Lake.
