Comments: Holland lake is one of my favorite recreation spots as a local Montana resident. In recent years the popularity of this lake has increased. This has already contributed to further litter and pollution of this pristine environment. Montana is in need of more recreation destinations but Holland lake is not the area. HOLLAND LAKE IS ONE OF MONTANA'S HIDDEN GEMS keep it for locals. As a student in forestry and resource conservation I am compelled to ask for environmental assessments of the area and impact that this may have. Including but not limited to things such as grizzly bear or other wildlife habitat future water quality and soil impacts. I would urge the leaders to not allow a resort of this magnitude at this lake as it will further constrict access for local residents.
